Computing	What is VR?	What is an online account?	What are scenes in my VR world?	How can we record our script and add it to our VR world?	How do we view our VR worlds?			
DT				I can research to develop a design specification for a functional product. (45mins)	I understand the essential characteristics of a series circuit and experience of creating a battery-	I can generate and develop innovative ideas and share and clarify these through discussion. (60 mins)	(FULL DAY) I understand and can use electrical systems in their products.	

Robert Mellors Primary Academy – Medium Term Plan

				I can communicate ideas through annotated sketches, pictorial representations of electrical circuits or circuit diagrams. (30 mins)	powered, functional, electrical product. (60 mins)	I can think about the requirements of a light for a particular purpose in terms of: – what it should look like and – how it might work; (30 mins)	I can competently select and accurately assemble materials, and securely connect electrical components to produce a reliable, functional product. I can continually evaluate and modify the working features of the product to match the initial design specification. I can test the system to demonstrate its effectiveness for the intended user and purpose.
